GHANA**

29th May 2015

TO WHOM IT MAY CONCERN

Dear Sir,

REFERENCE LETTER

Messrs. Consar Limited was the main contractor selected in 2011 to construct the new Head Office complex for Societe Generale, Ghana. They executed the works in the best time and performance.

Their availability, flexibility, reliability and professionalism are unparalleled and would not hesitate to recommend them to any company that requires their services.

This letter has been issued upon the request of the company without any responsibility to the Bank.

Yours faithfully,

Dear Sir.

**APPRECIATION FOR A SUCCESSFUL COMPLETION OF NEW
CONFERENCE CENTER, SPA, GYM & POOL**

We wish to express our appreciation for your sterling performance during the construction of our New Conference Centre, Spa, Gym & Pool at Labadi Beach Hotel.

The contribution and dedication of your team is worthy of special praise, given the satisfaction of our client and in particular we recognise the valuable contribution of your Project Manager, Roberto Marchiori, Commercial Director, Bismark Sarkodie and team and congratulate all of them for a successful project delivered.

Under difficult circumstances, working within a fully functioning Hotel, full of guest, your team was able to complete the project within tight deadline, conform to required quality standards and within budgets.

We won't hesitate to involve you in future projects within our West African division.

Regards

John Devine

Subject: Civil contract works, for T3-Power Plant. PO # 1171140
Aboadze, Sekondi-Takoradi. Ghana.

This is to certify that Civil Works of T3 Power Plant were carried out by M/s. CONSAR Ltd. as our civil subcontractor. They were responsible for the supply of concrete and civil works of the above mentioned project based on the measurement of work done.

The scope of their work included supply of batch plant for supplying concrete to the project for the drainage culverts, trenches and all of the major equipment foundations.

We found them to be conscientious and provided good quality work and we gladly recommend them for any civil work undertaking.

Sincerely,

Clayton Sabine

Attention: Mr. Stefano Ramella Pezza

Ref: Newmont Golden Ridge Ltd. Akyem Project

Dear Stefano,

On behalf of Newmont's Akyem Project Management Team, we would like to congratulate you and your company personnel on the successful completion of Consar's scopes of work on the Akyem Project. We also acknowledge Consar's excellent safety and quality performance throughout the project. Consar played a significant role in the success of the Akyem project and continues to be a major partner with Newmont Ghana.

- Contract 1267-CWS-C002: Wet Plant Concrete including Batching Plant
- Contract 1267-CWS-M003: General Administration Building
- Contract 1267-CWS-M001: General Site Buildings & Facilities

Consar has proven to be trusted partner to Newmont Ghana over the years beginning with the Ahafo Project and most recently with the Akyem project. We appreciate Consar's responsiveness and flexibility with respect to working on these significant, and sometimes challenging projects.

Consar Ltd's commitment to providing quality equipment and resources together with qualified and experienced staff has been a major factor in the successful completion of your contracts. Newmont also acknowledges and appreciates your dedication and the personal attention that you provided during the Akyem project to both your own company and the client.

Please extend our congratulations and gratitude to the entire Consar Team who worked on the Akyem project and who safely completed the various contract packages. Newmont looks forward to continuing the good relationship with Consar and hopefully working together on future projects in Ghana.

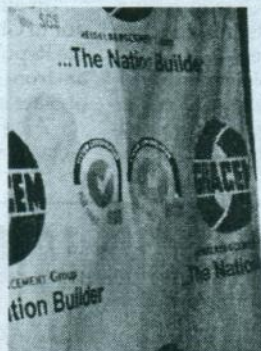

Sincerely,

A handwritten signature in blue ink that reads "John Corra".

DAILY GUIDE

27th JANUARY 2014

A representative of Consar Limited (right) receiving the Best Direct Customer Award on behalf of her company

GHACEM Rewards Customers

A business desk report

GHACEM LIMITED recently acknowledged the efforts of its customers and distributors at an awards night in Kumasi.

Many customers across the country received various awards at the Golden Tulip Hotel.

The awardees also received various allocations of cement for their hard work in 2013.

Consar Limited was adjudged the Overall Best Direct Customer for using about 35,000 tonnes of cement for its projects in the year 2013.

The Top Distributor award went to Isaac Owusu Ansah Enterprise of

Kumasi Sales for selling about 75,000 tonnes of cement while Nana K. Gyasi Company Limited also from Kumasi Sales emerged as the 1st Runner-up for selling about 66,500 tonnes of cement.

The 2nd Runner-up position was won by Doris Appiah Enterprise, five times champion from the Takoradi Sales for selling 53,000 tonnes of cement.

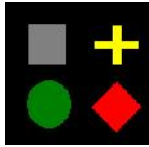

The Managing Director of GHACEM, Morten Gade, in an address, thanked the customers for their loyalty.

Since its establishment in August 1967, he said GHACEM has maintained its position as market leader in Ghana by holding many corporate

social responsibility activities.

Touching on the GHACEM Cement Foundation founded in 2002, he said it had donated about 385,000 bags of cement at an equivalent market value of about GHe8 million to construct health and educational facilities in deprived areas of the country.

Nana Philip Archer, Commercial Director of GHACEM said, "GHACEM will be competitive and offer customer-led solutions through quality service delivery and offer improved customer service by reducing waiting time at the plants, improving availability of cement at the depots and training our staff to be more professional in the discharge of our market actions."

Dear Sir

**Alterations to and Refurbishment of the Golden Tulip Hotel, Accra, Ghana
Consar Limited Building and Civil Engineering Contractors**

We refer to the above project on which Consar Limited was the Main Contractor.

The Client required the Hotel to continue functioning during the refurbishment works and Consar had to accommodate this in phases which took account of the continuing occupancy and other activities in the Hotel.

The Client also wished other works identified during the contract to be carried out and the importance of a good working professional relationship was important to the ultimate success of the project.

Based on the performance of Consar and their Team responsible for the works led by the Project Manager, we are pleased to recommend them for similar complex projects. We will also be pleased to provide any further information in support of this recommendation.

Yours faithfully

Dear Sir,

RE: APPRECIATION LETTER

We acknowledge receipt of your letter of appreciation dated 29th January 2013;

In consideration for the awards scheme, volumes of cement lifted from our Tema and Takoradi plants were noted and considered. However, volumes lifted from our Kumasi and Wa depots were not included for consideration in the award scheme.

We wish to indicate that with effect from 1st January 2013, Ghacem will include volumes lifted from any of our depots in assessing your performance that may warrant an award.

We are glad to bring to your notice that Ghacem has a depot located in Tamale within the Cocoboard Warehouse, where Consar Ltd could equally purchase cement.

In view of the above and to facilitate your cement purchases, our Sales Rep in Tamale, Mr Joseph Nyaaba on 020 8288580 will contact your Representative for assistance.

Please don't hesitate to contact the undersigned if you have any further concerns regarding your business with Ghacem.

Congratulations again for winning the Ghacem 2012 Overall Best Direct Customer Award.

Thank you.

6 November 2006

Dear Sir,

TO WHOM IT MAY CONCERN

Consar Ltd, Ghana, was a partner, in the construction of the US\$25M KMS and GCS Refrigeration Plants at the Obuasi Mine as a subcontractor for the civil works. They were a subcontractor to Bluhm Burton Engineering (BBE) of the Republic of South Africa, AngloGold Ashanti Ltd main contractor for the project.

Consar Ltd demonstrated, beyond all reasonable doubt, that they are world class civil contractors. Their equipment and labour competency and the strategy, planning and control they exercised demonstrate their ability and commitment to deliver any project safely, to the required quality, on time and to budget set.

The refrigeration plants are the first of their kind in Ghana and probably in the sub-region of West Africa and as such poses construction challenges. They completed the KMS and GCS works in five (5) and four (4) months respectively, within the targets set.

It must be noted that the speed at which work was done was not at the expense of quality and safety. The quality and safety records were excellent as there was no Loss Time Injury (LTI) after working close to 350,000 man-hours. The Mines Inspectorate in a letter dated 31 July 2006 on their routine inspection paid a glowing tribute to Consar's safety and quality of work.

I strongly recommend Consar Ltd to all those who require the services of a building and civil engineering contractor. It is a delight and joy to work with Consar Ltd.

Attention: Mr S Ramella

Dear Sir

Letter of Reference relating to Civil Works at Obuasi Mine's Refrigeration Project

As per your request, I am happy to provide you with a letter of reference with respect to the civil construction works you carried out for Bluhm Burton Engineering for the two refrigeration and air cooler installations at AngloGold Ashanti's KM and GC Shafts. In fact, with the project just about complete, it provides me with a good opportunity to express my thanks for the way in which the project has gone.

Our initial concerns about using a local (Ghanaian) contractor, soon subsided after we saw your modern fleet and equipment and the quality of Consar's workmanship at one of your other sites. Given the fast track requirement to have the first installation at KMS ready for December 2005, your team moved to site within days of contract award at beginning of May and earthworks commenced during site establishment. You were set an ambitious programme at KMS which you managed to achieve without sacrificing quality or safety.

Your teams are well managed and supervised, your plant is well maintained, the site is always kept neat and tidy and the result is a quality product. I have noticed attention to detail during construction that has not had to be spelt out in long contractual specifications or site instructions. In fact input from BBE, beyond the usual site supervision and quality control measures, during construction has been minimal.

As the project draws to a close your team has notched up 300 000 man-hours work without a single lost-time injury and will be suitably rewarded during my next visit. This is especially commendable given the amount of work that was done at height (up to 15 m)

I would not hesitate to recommend Consar for work of a similar nature.

Yours sincerely

Richard Gundersen

Attention: Mr. Stefano Ramalla Pezza

Ref: Newmont Ghana Gold Ltd - Ahafo Project

Dear Stefano,

On behalf of the Newmont Ghana Gold Ltd's Ahafo Project Management Team, we would like to congratulate you and your company personnel on the excellent performance of the multiple contracts awarded to Consar Ltd on this project. Consar Ltd has played a major role in the success of the Ahafo Project by performing the following contracts:

- Contract A001: Rank Camp Upgrade
- Contract G008: Concrete Block manufacturing
- Contract A005: Security Camp Facilities and 300 Man Contractors Camp
- Contract C021: Sand and Aggregate Supply
- Contract C051: Wet Plant Concrete
- Contract A015: Senior Staff Village Houses, Utilities and Recreational Facilities

From the very first contract for upgrades to the pioneer Rank Camp, Consar Ltd's competitive and quality performance has been rewarded with these multiple contract awards and has enabled Newmont Mining Corporation to complete its first ever project on the African Continent on schedule and within budget while establishing new standards for Safety, Environmental and Community Relations in the West African mining community.

Consar Ltd's commitment to providing significant new equipment resources and a core group of experienced craft for this project has been a major factor in the timely completion of your contracts and clearly establishes Consar Ltd at a level above all its competition. The personal attention that you have consistently devoted on each of the contracts and your experience and council on many issues, including labor relations, has been greatly appreciated.

To Whom It May Concern:

This letter confirms that CONSAR LTD. has been contracted on Gold Field Ghana Ltd.'s Tarkwa Phase IV Project for the supply and placement of all project concrete and block building structures. CONSAR was contracted to Gold fields Ghana Ltd. On a unit rate contract that was managed and supervised by our project EPCM consultant, Lycopodium Pty Ltd. of Perth Australia.

During the period beginning August 2003 to date, CONSAR has placed ~11,500 m³ of structural concrete in accordance with the project specifications and drawings. The contractor prepared all concrete in its own batch plant and delivered it to site locations using its own fleet of mixer trucks, including its newly acquired pump truck with extendable boom. Concrete was prepared using high quality sand and aggregate from the contractor's granite quarry located near Komasi, and cement produced here in Ghana. During the course of its work, the contractor's concrete consistently exceeded the structural strength requirements set out in the design and there was no work rejected, on the basis of concrete strength or installed quality. The contractor also bent and placed all reinforcing steel bars and erected all form work for plant footings, plinths, walls and slabs, including several large suspended slabs. Using a combination of metal shutters and site-built wooden forms, the contractor successfully cast all shapes and sizes of installations to design tolerances and achieved good surface finishes. In the few locations where surface defects occurred, they were quickly repaired or patched in an acceptable manner.

The contractor utilized expatriate lead supervisors and other national supervisors with many years experience in its organization. The majority of the laborers were locally hired and trained by the contractor. The contractor struggled at times to fulfill the requirements of our stringent safety program and was involved in the project's only serious accident which was a fatality; however it supervisors

Directors

I D Cockerill (Chairman), B I Walker (Managing Director), J Munro, R W Graeme, J F Conway, N K Kudjawu, E G Ku

F19

diligently worked with the EPCM consultant to improve and train the national work force. During the course of its activities at Tarkwa, the contractor had no serious environmental incidents and was always responsive to our Project Team's requests to improve housekeeping and dispose of its waste materials in accordance with our requirements.

In summary, we are pleased with the results obtained by CONSAR LTD and we would definitely consider using its services on any future project. Please feel free to contact me personally should you have any questions regarding the capabilities or activities of CONSAR LTD on our project.

Sincerely,

John A. Naisbitt

LETTER OF RECOMMENDATION

CONSTRUCTION OF KUMASI CENTRE FOR COLLABORATIVE RESEARCH IN TROPICAL MEDICINE, KNUST, KUMASI, GHANA

Consar Limited was contracted to construct the Kumasi Centre for Collaborative Research in Tropical Medicine (KCCR), Kwame Nkrumah University of Science and Technology, Kumasi on March 5, 2002.

The Contract particulars were as follows:

- | | | | |
|----|-------------------|---|--------------------|
| a) | Contract Price | : | Euro 739,062.50 |
| b) | Contract Period | : | Twelve (12) Months |
| c) | Commencement Date | : | March 11, 2002 |
| d) | Completion Date | : | March 10, 2003 |

The project comprises the following:

- a) Construction of two-storey administration/laboratory block of 1228m² floor area, with polished procelain floor finish to the offices and epoxy screed to the Laboratories.

Acoustic ceiling lining, ceramic wall cladding to the washrooms and painted rendered walls.
- b) Construction of a single-storey cafeteria block of 232m² floor area also with polished procelain floor finish, plywood ceiling lining with polished mouldered battens.
- c) Construction of a single-storey caretaker's residence of three bedrooms, a hall, kitchen, toilet and shower, all of a total area of 160m². Finishes same as the cafeteria.
- d) Construction of a single-storey workshop of floor area 243m² and with finishes same as cafeteria. Also included are the construction of tiled service pit and installation of fuel storage tank fitted with electric pump.

F17

- e) Construction of a two-storey guesthouse of four flats of total area 589m² with finishes area as same as the cafeteria.
- f) General external works – extensive external works comprising the construction of soil and waste drainage system, bitumen finish driveways and roads, carports, paved walkways and horticultural works. Construction of overhead water tank, roofed carport for six and street lighting system and installation of garden lamps.

The project was completed at a later date in September 30, 2003 due to extensive additional work and changes, necessary to fulfil clients needs to create a harmonious atmosphere for employees and guests at laboratory, administration, guesthouse and cafeteria. I am impressed with the readiness the contractor responded to special needs of the client.

I wish to congratulate M/S Consar limited for a very good and satisfactory work done.

Both the structural and finishes were done to a first class standard.

Services which included the provision of telephone system, air-conditioning installation, and electrical installation to the Laboratories were all satisfactorily done, and working efficiently.

I therefore have the pleasure to recommend them to any one who wishes to engage their services for the same kind of work, and I give the assurance that there will be no regrets whatsoever.

Yours faithfully

RECOMMENDATION

Messrs. CONSAR LIMITED of Kumasi - Ghana were our sub-contractor in the construction of the major civil works for Morila gold mine project, Republic of Mali.

The project nature comprises of the foundation construction of the following

- a. Main crusher
- b. Ball and sag mills
- c. Pebble and oxide crushers
- d. Stock-file and conveyor line
- e. Thickener and CIL
- f. Other related civil construction

Their plant and equipment, logistics and manpower were up to the standard to meet the requirements of the mine construction phase.

We have no objection and reservation in recommending Messrs. CONSAR LIMITED for similar scope and type of project.

Very truly yours

To Whom It May Concern

This letter is to confirm that that Consar Limited of Kumasi completed the Concrete Works Contract for the Bibiani Gold Treatment Plant in Ghana.

This contract included the excavation, formwork, supply and placement of over 2,500 cubic meters of 25Mpa reinforced concrete including a large crushing chamber and two large mill foundations.

Consar Limited's workmanship was of an acceptable standard and their equipment on site was well maintained and reliable. The management and staff were very obliging and most cooperative.

Should we be working in Ghana again we would have no hesitation in including them on the bid list.

RE : PERFORMANCE OF CONSAR AS CIVIL CONTRACTOR
FOR THE BACKFILL PLANT AND PTP UPGRADE

Consar were employed as the civil contractor for the Backfill and PTP upgrade projects.

Their performance has been exemplary in all aspects of their work. I can honestly say that the quality of workmanship is equal to or better than similar contracts undertaken by South African, Australian and UK contractors.

Contractual matters are dealt with in a most satisfactory manner and programs in both cases were extremely tight. I am happy to say that in both instances they improved upon their completion dates. Their tenders were also extremely competitive.

Without reservation I would highly recommend Consar for any civil works of this nature. I am available for any queries any potential client may wish to discuss. I will certainly continue to view Consar as a preferred contractor in all future dealings of this nature.

Yours sincerely,

G. Potter

CONSAR LIMITED

This is to confirm that the above-named company, under the directorship of Mr. S. Ramella-Pezza, has successfully completed the construction of a double-chamber 1500m³ reinforced concrete water reservoir for Kumasi Brewery Limited.

The reservoir which has so far been commissioned was completed within the time limit of 4 (four) months set for the company. Upon commissioning, no single leakage was detected.

Consar Ltd. has for the past ten (10) years proven to be punctual and has executed all construction works for our company satisfactorily.

To whom it may concern

This letter is to confirm that during the year 1996, Messrs Consar Ltd carried out various construction work at our Guinness Ghana Kumasi Brewery site.

In particular they carried out and completed the civil works for a new 36,000 bottle per hour bottling line.

The work was carried out to a very high standard, executed on time and within budget. We found Consar Ltd to be flexible and willing to accommodate our every need.

We would have no hesitation in recommending Consar Ltd to anyone considering building or civil construction, albeit it large or small works.

Andrew Jenkins

MEMORANDUM

TO : Consar Limited
ATTN : Mr. Stefano Ramela Pezza
FROM : JCI Limited - Mr. M. Greenblat
DATE : 8th November 1996
SUBJECT : COMPLETION OF CIVIL CONSTRUCTION
WORK FOR BACKFILL PROJECT.

On behalf of JCI's Site Management team and myself we wish to thank Consar for their contribution towards the success of this Project.

Consar provided AGC/JCI with a professional construction service which is well appreciated. Consar maintained a good quality of workmanship and managed to meet the required access dates for other contractors. 

Should we be engaged in future projects in Ghana, we will not hesitate to give Consar the opportunity to carry out the civil construction work.

Regards

M. Greenblat

Dear Mr. Pezza,

By venue of this letter I wish to acknowledge the excellent work performed by your firm in the construction, under contract to the Canadian Government, of the GWSC Housing Compound in Tamale.

I wish also to underline the importance we attached to have the construction built on time and within budget. This, your firm accomplished in a fully satisfactory manner.

I take this opportunity to extend to yourself and your employees best wishes for continued success in your future endeavors.

Yours truly,

Gerald Chauvet
